WORK EXPERIENCE

Lightcast - Moscow, ID (*working remotely*)

01/2022 - Current

Software Engineer II

- Successfully coded and redesigned the Talent application, enhancing the user experience and driving engagement with a micro frontend for a cloud-based workforce data product.
- Contributed to the launch of Spotlight, a new product targeting global market users, by transforming raw workforce data into engaging and actionable business insights through customizable dashboards. This effort was aligned with the strategic objectives of the high-growth SaaS company with a revenue exceeding \$100 million.
- Applied agile practices to deliver daily coding, reviewing, and testing goals, promoting efficiency and productivity within the full life-cycle software development process.
- Paid strong attention to producing scalable, data-intensive React pages, ensuring that the production code maintained at high level of quality and reliability.

EPAM Systems - San Diego, CA

01/2021 - 01/2022

Full Stack Software Engineer

- Developed high-performance, production-ready full-stack applications with a strong focus on speed and quality.
- Nurtured and guided junior developers through hands-on pair programming sessions and engaging presentations, fostering their growth and professional development.
- Proficiently utilized Git for robust source control management and collaborated within a cross-functional product team, comprising engineers, product managers, designers, and business analysts.

Meelz - San Diego, CA

12/2019 - 12/2020

Frontend Software Developer

- Played a key role in maintaining the application, enhancing its performance for maximum speed and scalability, and implementing SEO strategies to maximize online visibility and reach.

EDUCATION

San Diego State University - San Diego, CA

Bachelor of Science - BS – Computer Science
